Continuation of 5. does NOT place the application in condition for allowance because: Applicant states that no reference suggests providing power class information in particular. Oprescu et al. teach providing power requirements (col. 6, lines 27-41; col. 7, line 11 - col. 8, line 65). Applicant's disclosure states that the power class may be in terms of voltage and current (page 7, lines 15-20). Oprescu et al. discuss the power requirements in terms of watts (col. 8, lines 1-41). So the power requirements provided in Oprescu et al. meet the limitations of power class. Of course, power requirement information could be provided in terms of load and current, or load and voltage. Oprescu et al. do not particularly teach making a request for information, which, as demonstrated in the previous Office Action, is well known. Oprescu et al. do teach receiving power requirements or power class information.
